

Sébastien Grans

Senior PHP/Laravel Backend Engineer | APIs · Event-Driven Systems · Applied AI

Lozère, France · Fully remote · CET timezone

sebastien.grans@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Target role: Backend Engineer (PHP/Laravel) — Cargofy

Profile

Senior back-end engineer with **8+ years of professional PHP experience** across Laravel and Symfony. I build and operate APIs, asynchronous workflows and data-intensive services, with a strong focus on performance, reliability and clear business logic.

At Evina, I worked on high-traffic Laravel services using queues, workers, WebSockets, MySQL and Redis in a multi-region environment. Cargofy's mix of Laravel, real-time integrations and applied AI is particularly motivating to me, especially the opportunity to work with LLM agents and Voice AI in a product used internationally.

Core Skills

Back end: PHP 8 · Laravel · Symfony · API Platform · REST/OpenAPI · Eloquent/Doctrine · service containers · events · queues/workers · WebSockets

Data and performance: PostgreSQL · MySQL/MariaDB · Redis · schema design · indexing · query optimisation · caching · asynchronous processing

Architecture and quality: OOP · SOLID · PSR standards · modular and layered architecture · DDD · PHPUnit · Behat · integration and end-to-end testing · PHPStan/Larastan · code review

Delivery: Git · Docker · Kubernetes · AWS · GitHub/GitLab CI/CD · Jenkins · ELK · Grafana · Sentry · Linux · Bash · controlled AI-assisted engineering

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments

- Developed and operated PHP/Laravel services supporting fraud prevention, mobile-payment flows and real-time processing.
- Built and maintained REST APIs and integrations, with attention to compatibility, authentication and data integrity across several products.
- Reduced latency and MySQL load through indexing and a progressive migration of high-traffic tracking and scoring data to Redis.
- Worked with queues, workers and WebSockets and investigated production incidents through ELK and Grafana in a multi-region environment.
- Wrote and reviewed tests, participated in daily code reviews and contributed pragmatic architecture and refactoring decisions.
- Collaborated with English-speaking developers and international stakeholders in a fully remote team.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Business automation

- Designed and delivered a JWT-secured Symfony/API Platform service for asynchronous PDF-to-XML processing.
- Built documented REST endpoints, callbacks, Doctrine models and automated integration tests from incomplete business requirements.
- Developed Laravel business features and supported Docker, GitLab CI/CD, AWS CloudWatch and Sentry workflows.

Earlier Experience

- **Groupe Blachère — Back-End Developer (Dec. 2020–Jan. 2021):** Symfony domain modelling, constraint-based optimisation, tests and PHPStan.
- **SensioLabs — Symfony Developer (2018):** Symfony/API Platform, RabbitMQ, Redis, JWT, PHPUnit and Behat.
- **Norsys — PHP/Symfony Developer and Technical Referent (2013–2018):** applications for Decathlon, Fiducial, Technal and Franprix; architecture support, code review and mentoring.

Side Projects

Sonomundi — Laravel/Vue Event Platform

July 2024–Present · Side project, now largely automated

- Built a Laravel 12/Vue 3 product using REST/OpenAPI, MySQL, Redis, modular boundaries, asynchronous workflows, automated tests, Docker and CI/CD validation.
- Own its product decisions, architecture, implementation and documentation, using controlled AI-assisted workflows with executable tests and human review.
