

Sébastien Grans

Senior PHP Backend Engineer | Secure APIs · Symfony · Laravel

France · Fully remote within Europe · CET timezone

sebastien.grans@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Target role: Backend Engineer (PHP) — DevsData

Profile

Senior back-end engineer with **8+ years of professional PHP experience** across Symfony and Laravel. I build secure APIs, business-critical services and tested applications, and I am comfortable taking a feature from specification to production support.

My strongest match for this role is Evina: two years developing high-traffic Laravel services for cybersecurity, fraud prevention and mobile payments. The work covered secure authentication, API compatibility, vulnerability checks, performance, code reviews and production incidents in an international remote environment.

Core Skills

Back end: PHP 8 · Symfony · Laravel · API Platform · REST/OpenAPI · Doctrine/Eloquent · queues/workers · JavaScript · Bash

Security and data: OWASP awareness · Auth0 · Laravel Sanctum · JWT · roles/access control · dependency and Docker-image vulnerability checks · GDPR-aware development · MySQL/MariaDB · PostgreSQL · Redis

Quality: PHPUnit · Behat · integration and end-to-end testing · PHPStan/Larastan · code review · API versioning and backward compatibility

Delivery: Git · Docker · Kubernetes · GitLab/GitHub CI/CD · Jenkins · ELK · Grafana · Sentry · Linux

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments

- Developed and maintained PHP/Laravel services supporting fraud prevention, mobile-payment flows and real-time processing.
- Integrated Auth0 and Laravel Sanctum across several applications, with attention to roles, data migration, service continuity and API compatibility.
- Checked dependencies, application code and Docker images for vulnerabilities and contributed to security and refactoring decisions.
- Reduced latency and MySQL load through indexing and a progressive migration of tracking and scoring data to Redis.
- Wrote and reviewed tests, participated in daily code reviews and investigated production incidents through ELK and Grafana in a multi-region environment.
- Collaborated with English-speaking developers and international stakeholders in a fully remote team.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Business automation

- Designed a JWT-secured Symfony 5.4/API Platform service for asynchronous PDF-to-XML processing.
- Built documented REST endpoints, callbacks, Doctrine models and automated integration tests.
- Developed Laravel business features and supported Docker, GitLab CI/CD, AWS CloudWatch and Sentry workflows.

Earlier Experience

- **Groupe Blachère — Back-End Developer (Dec. 2020–Jan. 2021):** Symfony, domain modelling, optimisation algorithm, tests and PHPStan.
- **SensioLabs — Symfony Developer (2018):** Symfony/API Platform, RabbitMQ, Redis, JWT, PHPUnit and Behat.
- **Norsys — PHP/Symfony Developer and Technical Referent (2013–2018):** applications for Decathlon, Fiducial, Technal and Franprix; architecture support, code review and mentoring.

Side Projects

Sonomundi — Laravel/Vue Event Platform

July 2024–Present · Side project, now largely automated

- Built a Laravel/Vue 3 product using REST/OpenAPI, MySQL, Redis, asynchronous workflows, automated tests, Docker and CI/CD validation.
- Own its architecture, implementation and documentation, using controlled AI-assisted workflows with executable tests and human review.
