

Sébastien Grans

Senior PHP Backend Engineer | Symfony · Laravel · High-Traffic Systems

France · Fully remote within Europe · CET timezone

sebastien.grans@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Target role: Backend Engineer, PHP — Eneba

Profile

Senior back-end engineer with **8+ years of professional PHP experience** building and operating APIs, microservices and business-critical products. Strong Symfony and Laravel background, with hands-on ownership of performance, authentication, asynchronous processing, observability, CI/CD and production incidents.

At Evina, I worked on cybersecurity and mobile-payment services where reliability, speed and safe change mattered every day. I enjoy learning unfamiliar systems, turning incomplete requirements into maintainable solutions and contributing directly to architecture discussions.

Core Skills

Back end: PHP 8 · Symfony · Laravel · API Platform · REST/OpenAPI · Doctrine/Eloquent · microservices · queues/workers · RabbitMQ · WebSockets

Data and performance: MySQL/MariaDB · PostgreSQL · Redis · Elasticsearch/ELK · indexing · query optimisation · caching · data migrations

Architecture and quality: OOP · SOLID · design patterns · DDD · CQRS/Event-Driven Design familiarity · PHPUnit · Behat · PHPStan/Larastan · code review

Delivery and operations: Docker · Kubernetes · AWS · Jenkins · GitLab/GitHub CI/CD · Grafana · Sentry · Linux · production support

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments

- Developed and operated critical PHP/Laravel services supporting fraud prevention, mobile-payment flows and real-time processing.
- Reduced latency and MySQL load through indexing and a progressive migration of tracking and scoring data to Redis.
- Integrated Auth0 and Laravel Sanctum across several applications and contributed to API compatibility, security and refactoring decisions.
- Worked with queues, workers and WebSockets; investigated production incidents through ELK and Grafana in a multi-region environment.
- Participated in automated testing, daily code reviews, Kubernetes delivery and technical discussions with international stakeholders in English.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Business automation

- Designed a JWT-secured Symfony 5.4/API Platform service for asynchronous PDF-to-XML processing.
- Built REST endpoints, callbacks, Doctrine models, integration tests and technical documentation.
- Developed Laravel business features and supported Docker, GitLab CI/CD, AWS CloudWatch and Sentry workflows.
- Translated incomplete business requirements into deliverable solutions in direct collaboration with the CTO and Product Owner.

Earlier Experience

- **Groupe Blachère — Back-End Developer (Dec. 2020–Jan. 2021):** Symfony, domain modelling, optimisation algorithm, tests and PHPStan.
- **SensioLabs — Symfony Developer (2018):** Symfony/API Platform integrations, RabbitMQ, Redis, JWT, PHPUnit and Behat.
- **Norsys — PHP/Symfony Developer and Technical Referent (2013–2018):** applications for Decathlon, Fiducial, Technal and Franprix; PostgreSQL, architecture support, code review and mentoring.

Side Projects

Sonomundi — Laravel/Vue Event Platform

July 2024–Present · Side project, now largely automated

- Built a Laravel/Vue 3 product with REST/OpenAPI, MySQL, Redis, asynchronous workflows, automated tests, Docker and CI/CD validation.
- Own its architecture, implementation and documentation, using controlled AI-assisted workflows with executable tests and human review.
