

Sébastien Grans

Senior Backend & Data Migration Engineer | PHP · Laravel · MySQL/PostgreSQL

Lozère, France · Fully remote within Europe · CET timezone

sebastien.grans@gmail.com · [LinkedIn](#) · [GitHub](#) · [Full CV](#)

Target role: Database Migrations Engineer — Laravel

Profile

Senior back-end engineer with **8+ years of professional PHP experience** across Laravel and Symfony. I build and operate APIs and business-critical services, with hands-on work across MySQL/MariaDB, PostgreSQL, Redis, data modelling, imports, performance optimisation and production support.

At Evina, I delivered production data changes for cybersecurity and mobile-payment services, including user-data normalisation and asynchronous imports, MySQL indexing, and a progressive migration of high-traffic tracking and scoring data to Redis. I am comfortable investigating unfamiliar systems, documenting operational knowledge and turning recurring work into tested, repeatable workflows.

Core Skills

Data and migration: MySQL/MariaDB · PostgreSQL · Redis · Doctrine/Eloquent · relational modelling · data normalisation · indexing · query optimisation · asynchronous imports · data migrations

Back end: PHP 8 · Laravel · Symfony · API Platform · REST/OpenAPI · queues/workers · RabbitMQ · WebSockets · CLI tooling

Quality and operations: PHPUnit · Behat · integration testing · PHPStan/Larastan · code review · ELK · Grafana · Sentry · incident investigation · technical documentation

Delivery: Docker · Kubernetes · AWS · Jenkins · GitLab/GitHub CI/CD · Linux · controlled AI-assisted engineering workflows

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments

- Developed and operated PHP/Laravel services supporting fraud prevention, mobile-payment flows and real-time processing in a multi-region environment.
- Implemented user-data normalisation, asynchronous import commands and role mapping across several applications, with attention to data integrity, API compatibility and service continuity.
- Reduced latency and MySQL load through indexing and a progressive migration of high-traffic tracking and scoring data to Redis.
- Monitored production behaviour through ELK and Grafana, investigated incidents and contributed to safe rollout and refactoring decisions.
- Worked with queues, workers, WebSockets, automated tests, Kubernetes delivery and daily code review.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Business automation

- Designed a JWT-secured Symfony 5.4/API Platform service for asynchronous PDF-to-XML processing.
- Built REST endpoints, callbacks, Doctrine models, integration tests and technical documentation.
- Developed Laravel business features and supported Docker, GitLab CI/CD, AWS CloudWatch and Sentry workflows.
- Translated incomplete business requirements into deliverable solutions with the CTO and Product Owner.

Earlier Experience

- **Groupe Blachère — Back-End Developer (Dec. 2020–Jan. 2021):** Symfony, domain modelling, optimisation algorithm, tests and PHPStan.
- **SensioLabs — Symfony Developer (2018):** Symfony/API Platform integrations, RabbitMQ, Redis, JWT, PHPUnit and Behat.
- **Norsys — PHP/Symfony Developer and Technical Referent (2013–2018):** applications for Decathlon, Fiducial, Technal and Franprix; PostgreSQL, Doctrine/MariaDB migration work, architecture support, code review and mentoring.

Side Projects

Sonomundi — Laravel/Vue Event Platform

July 2024–Present · Side project, now largely automated

- Built a Laravel/Vue 3 product with REST/OpenAPI, MySQL, Redis, asynchronous workflows, automated tests, Docker and CI/CD validation.
- Own its architecture, implementation and documentation, using controlled AI-assisted workflows with executable tests and human review.
