

Profile

Senior back-end engineer with **8+ years of professional PHP experience** across Laravel and Symfony. I build business-critical applications and APIs, with a strong focus on clear module boundaries, automated testing, performance and production reliability.

My closest experience to this role combines high-traffic Laravel services at Evina with Sonomundi, a Laravel 12/Vue 3 product I built from scratch. I use AI coding agents as part of a controlled engineering workflow: they accelerate exploration, implementation and testing, while architecture, business rules, security and final review remain human decisions.

Core Skills

Back end: PHP 8 · Laravel 12 · Symfony · API Platform · REST/OpenAPI · Eloquent/Doctrine · modular monoliths · events · queues/workers · WebSockets · third-party integrations

Data and identity: PostgreSQL · MySQL/MariaDB · Redis · schema design · indexing · query optimisation · Auth0 · Laravel Sanctum · JWT · roles and access control · GDPR-aware development

Architecture and quality: OOP · SOLID · PSR standards · modular and layered architecture · pragmatic DDD · PHPUnit · Behat · integration and end-to-end testing · PHPStan/Larastan · code review

Delivery: Vue 3 · TypeScript · Docker · Kubernetes · AWS · GitHub/GitLab CI/CD · Jenkins · ELK · Grafana · Sentry · Linux · controlled AI-agent workflows

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments

- Developed and operated PHP/Laravel services supporting fraud prevention, mobile-payment flows and real-time processing.
- Integrated Auth0 and Laravel Sanctum across several applications, with attention to roles, data migrations, API compatibility and service continuity.
- Reduced latency and MySQL load through indexing and a progressive migration of high-traffic tracking and scoring data to Redis.
- Worked with queues, workers and WebSockets; investigated production incidents through ELK and Grafana in a multi-region environment.
- Wrote and reviewed tests, participated in daily code reviews and contributed pragmatic architecture and refactoring decisions.
- Collaborated with English-speaking developers and international stakeholders in a fully remote team.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Business automation

- Designed and delivered a JWT-secured Symfony/API Platform service for asynchronous PDF-to-XML processing.
- Built documented REST endpoints, callbacks, Doctrine models and automated integration tests from incomplete business requirements.
- Developed Laravel business features and integrations and supported Docker, GitLab CI/CD, AWS CloudWatch and Sentry workflows.

Earlier Experience

- **Groupe Blachère — Back-End Developer (Dec. 2020–Jan. 2021):** Symfony domain modelling, constraint-based optimisation, tests and PHPStan.
- **SensioLabs — Symfony Developer (2018):** Symfony/API Platform, RabbitMQ, Redis, JWT, PHPUnit and Behat.
- **Norsys — PHP/Symfony Developer and Technical Referent (2013–2018):** applications for Decathlon, Fiducial, Technal and Franprix; architecture support, code review and mentoring.

Side Projects

Sonomundi — Laravel/Vue Event Platform

July 2024–Present · Side project, now largely automated

- Built a Laravel 12/Vue 3 product using REST/OpenAPI, MySQL, Redis, modular boundaries, asynchronous workflows, automated tests, Docker and CI/CD validation.
 - Own product decisions, architecture, implementation and documentation, using coding agents with executable tests, static analysis and human review as validation gates.
- [Live demonstration](#)

Education and Languages

DEUST in Webmaster and Internet Professions — University of Limoges, 2012

French: Native · **English:** Professional working proficiency (B2); international collaboration and technical discussions
