

Sébastien Grans

Senior PHP/Symfony Engineer | APIs · DDD · Fintech Systems

France · Fully remote within Europe · CET timezone

sebastien.grans@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Target role: Senior PHP Developer with DDD — WhiteTech

Profile

Senior PHP engineer with **8+ years of professional experience** delivering secure APIs and business-critical systems. Deep Symfony expertise combined with hands-on Laravel delivery, strong object-oriented design, PostgreSQL/MySQL, Doctrine, automated testing and production ownership.

My approach to DDD is pragmatic: model the business clearly, protect domain boundaries and use patterns only when they reduce real complexity. I combine this with direct fintech experience in cybersecurity, fraud prevention and mobile-payment services at Evina.

Core Skills

Back end: PHP 8 · Symfony · Laravel · API Platform · REST/OpenAPI · Doctrine/Eloquent · JWT · Auth0 · Laravel Sanctum · queues/workers · RabbitMQ · WebSockets

Architecture: OOP · SOLID · DDD · domain modelling · bounded-context concepts · design patterns · asynchronous processing · API and integration design · CQRS/Event Sourcing familiarity

Data: PostgreSQL · MySQL/MariaDB · Redis · relational modelling · normalisation · indexing · query optimisation · structured-data processing

Quality and operations: PHPUnit · Behat · PHPStan/Larastan · integration testing · code review · Docker · Kubernetes · Jenkins · GitLab/GitHub CI/CD · AWS CloudWatch · ELK · Grafana · Sentry

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments

- Developed and operated critical PHP/Laravel services supporting fraud prevention, mobile-payment flows and real-time processing.
- Improved scalability through MySQL indexing and a progressive migration of tracking and scoring data to Redis.
- Integrated Auth0 and Laravel Sanctum across several applications to standardise authentication and user management.
- Contributed to architecture decisions, refactoring, automated tests and daily code reviews across multiple products.
- Investigated production incidents with ELK and Grafana and collaborated with international stakeholders in English.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Business automation

- Designed a JWT-secured Symfony 5.4/API Platform service for asynchronous PDF-to-XML processing.
- Built REST endpoints, callbacks, Doctrine models, integration tests and technical documentation.
- Developed business rules with the Product Owner and integrated external services in a multi-environment architecture.
- Supported Docker, GitLab CI/CD, Postman/Newman, AWS CloudWatch and Sentry delivery workflows.

Earlier Experience

- **Groupe Blachère — Software Development Engineer (Dec. 2020–Jan. 2021):** reviewed and improved a Symfony project built around DDD concepts and a constraint-based optimisation domain; tests and PHPStan.
- **SensioLabs — Symfony Developer (2018):** Symfony/API Platform integrations with Microsoft Graph, Yammer and Bing; RabbitMQ, Redis, JWT, PHPUnit and Behat.
- **Norsys — PHP/Symfony Developer and Technical Referent (2013–2018):** applications for Decathlon, Fiducial, Technal and Franprix; domain analysis, Doctrine optimisation, architecture support, code review and mentoring.

Side Projects

Sonomundi — Laravel/Vue Event Platform

July 2024–Present · Side project, now largely automated

- Built a Laravel/Vue 3 product from scratch with REST/OpenAPI, MySQL, Redis, asynchronous workflows, tests, Docker and CI/CD validation.
- Own domain modelling, architecture, implementation and documentation; use controlled AI-assisted workflows with executable tests and human review.
