

Sébastien Grans

Senior Laravel/PHP Back-End Engineer | REST APIs · Integrations · TDD

France · Available for fully remote work across Europe

sebastien.grans@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Target role: **Senior Backend Developer** — [Bookinglayer](#)

Profile

Senior Laravel/PHP engineer with **8+ years of professional experience** delivering reliable APIs and business-critical back-end systems. I bring years of hands-on Laravel delivery backed by deep Symfony expertise, with a strong focus on clean architecture, automated testing, performance and production reliability.

I have built secure REST APIs, third-party integrations and asynchronous processing workflows, and I currently develop Sonomundi, a Laravel/Vue product involving event aggregation, structured data and location-based services. I work effectively in international remote environments through clear English communication, documentation, ownership and incremental delivery.

Core Skills

Back end: PHP 8 · Laravel · Symfony · API Platform · REST APIs · OpenAPI · Eloquent/Doctrine · webhooks · third-party integrations · Auth0 · Laravel Sanctum · JWT · queues/workers · WebSockets

Data: MySQL/MariaDB · PostgreSQL · Redis · data modelling · indexing · query optimisation · PDF/XML and structured-data processing

Quality: TDD mindset · PHPUnit · Behat · PHPStan/Larastan · unit, integration and functional testing · API testing · code review · refactoring · technical documentation

Delivery: Docker/Compose · GitHub/GitLab CI/CD · AWS CloudWatch · Sentry · ELK · Grafana · monitoring · incident response · controlled rollouts

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments

- Developed and maintained critical PHP/Laravel services supporting fraud prevention, mobile-payment flows and real-time processing.
- Improved performance through MySQL indexing and the progressive migration of tracking and scoring data to Redis.
- Integrated Auth0 and Laravel Sanctum across several applications to standardise authentication and user management.
- Investigated production incidents across APIs, workers, Redis and MySQL using ELK and Grafana.
- Contributed to architecture decisions, daily code reviews and developer support; delivered technical workshops in English.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Retirement services and business automation

- Designed a JWT-secured Symfony/API Platform REST service transforming pension-statement PDFs into structured XML data.
- Implemented upload, asynchronous processing, callback and download workflows with API tests and documentation.
- Built Laravel business features and integrations in direct collaboration with the CTO, Product Owner and an external provider.
- Supported reliable delivery with Docker, CI/CD, Postman/Newman, AWS CloudWatch and Sentry.

Earlier Experience

- **Groupe Blachère — Software Development Engineer (Dec. 2020–Jan. 2021):** Symfony, object-oriented/DDD design, automated tests and PHPStan.
- **SensioLabs — Back-End Developer (2018):** Symfony/API Platform integrations with Microsoft Graph, Yammer and Bing; RabbitMQ, Redis, Behat and PHPUnit.
- **Norsys — Back-End Developer / Symfony Technical Referent (2013–2018):** PHP/Symfony products for Decathlon, Fiducial, Technal and Franprix; technical guidance and code reviews.

Independent Product Engineering

Sonomundi — Laravel/Vue Event Platform

July 2024–Present · Side project, now largely automated

- Building a product from scratch with Laravel, Vue 3, TypeScript, REST/OpenAPI, MySQL, Redis, asynchronous jobs, tests and Docker.
- Aggregating and normalising event data through external services, with location-based information and controlled enrichment workflows.
- Applying AI-assisted engineering to analysis, implementation, testing and documentation while retaining human review and executable validation.
