

Sébastien Grans

Senior Full-Stack Developer — PHP, Symfony, Vue.js

France · Fully remote within Europe

sebastien.grans@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Target: Senior Full Stack Developer (PHP) — JobLeads

Profile

Senior software engineer with seven cumulative years of salaried professional experience building and operating web applications, REST APIs and business-critical services. Deep expertise in PHP and Symfony/Laravel, backed by object-oriented design, Doctrine/Eloquent, MySQL, Redis, automated testing, code review, documentation and production ownership.

I currently build Sonomundi end to end with Laravel, Vue 3 and TypeScript. Earlier roles include high-traffic cybersecurity and payment services at Evina, a Symfony/API Platform integration at Sapiendo, and technical leadership on Symfony projects at Norsys. I work effectively in English-speaking, fully distributed teams through clear written communication, documented decisions and incremental delivery.

Core Skills

- **Backend:** PHP 8, Symfony, Laravel, Doctrine, Eloquent, API Platform, REST/OpenAPI, MySQL/MariaDB, Redis, RabbitMQ, WebSockets, queues and workers
- **Frontend:** Vue.js/Vue 3, TypeScript, JavaScript, HTML, CSS, Vite, Pinia, Twig; working knowledge of Nuxt.js and React
- **Architecture & quality:** OOP, SOLID, design patterns, scalable services, PHPUnit, Behat, PHPStan/Larastan, integration testing, code review, refactoring and technical documentation
- **Delivery & operations:** Git, Docker, Docker Compose, GitLab CI/CD, GitHub Actions, Jenkins, Kubernetes, AWS CloudWatch, ELK, Grafana, Sentry, monitoring and incident response
- **Collaboration:** product discovery, technical decisions, mentoring, cross-functional work with product and business stakeholders, asynchronous remote delivery
- **Languages:** French native; professional English, written and spoken

Professional Experience

Sonomundi — Product Creator / Senior Full-Stack Engineer (independent)

July 2024 – present · France · Remote

- Design and development of a web product with Laravel, Vue 3 and TypeScript, covering business modelling, APIs, multi-role authentication, administration interfaces and product workflows.
- Maintain OpenAPI contracts, automated backend and UI tests, Docker-based environments and CI/CD validation.
- Own the complete delivery cycle: requirements clarification, architecture, implementation, review, deployment preparation and documentation.
- Use controlled AI-assisted engineering workflows for analysis, implementation and test generation, with reproducible checks and mandatory human review.

Stack: PHP, Laravel, Vue 3, TypeScript, JavaScript, HTML/CSS, MySQL, Redis, OpenAPI, Docker, Git, CI/CD, PHPUnit, Playwright

Evina — Senior Back-End Developer

June 2022 – June 2024 · Full remote

- Developed and operated critical, high-traffic PHP/Laravel services for cybersecurity and mobile payments in a distributed engineering team.
- Improved scalability and data access through MySQL indexing and a progressive MySQL-to-Redis migration, with monitoring and rollback planning.
- Implemented secure authentication across several applications with Auth0 and Laravel Sanctum.
- Contributed to architecture decisions, refactoring, automated tests and daily code reviews across multiple products.
- Participated in production on-call, incident analysis and observability using ELK and Grafana; documented decisions and collaborated with English-speaking developers and stakeholders.

Stack: PHP, Laravel, MySQL, Redis, Auth0, Sanctum, Docker, WebSockets, React, Jenkins, GitHub, Kubernetes, ELK, Grafana

Sapiendo — Back-End Developer / DevOps

February 2021 – May 2022 · Full remote

- Designed and delivered a JWT-secured Symfony 5.4/API Platform service converting uploaded retirement PDFs into XML through asynchronous callbacks.
- Built custom upload/download operations, REST endpoints, integration tests, Postman/Newman checks and architecture documentation.
- Developed Laravel business features and retirement algorithms while working closely with the Product Owner.
- Reviewed pull requests, mentored an internal developer and supported Docker, GitLab CI/CD, AWS CloudWatch and Sentry delivery workflows.

Stack: PHP 8, Symfony 5.4, Laravel, Doctrine, API Platform, MySQL, Docker, GitLab CI/CD, AWS, CloudWatch, Sentry, Nuxt.js

Groupe Blachère — Software Development Engineer

December 2020 – January 2021 · Hybrid

- Built a Symfony interface and API around an object-oriented placement/optimisation algorithm, with DDD modelling, automated tests, PHPStan and Docker.

SensioLabs — Symfony Developer

April 2018 – September 2018 · Full remote

- Developed Symfony features and API integrations using Microsoft Graph, Yammer and Bing; worked with RabbitMQ, Redis, JWT, PHPUnit, Behat and Docker/Travis CI.

Norsys — PHP/Symfony Developer and Technical Referent

September 2013 – March 2018 · Lyon area

- Delivered PHP/Symfony applications for Decathlon, Fiducial, Technal and Franprix.
- Acted as Symfony technical referent for a three-developer team: architecture support, module breakdown, Doctrine query optimisation, code review and mentoring.

Education

- DEUST Webmaster and Internet Professions — University of Limoges, 2012
- Technological Baccalaureate STT, IT specialisation, 2005
