

Sébastien Grans

Senior Full-Stack PHP Developer | Laravel · Symfony · Technical Delivery

Lozère, France · Remote within the European Union · CET timezone

sebastien.grans@gmail.com · [LinkedIn](#) · [GitHub](#) · Full CV: <https://axxon.github.io/>

Target role: **Senior Full Stack PHP Developer** — Oxford International Education Group

Profile

Senior PHP engineer with **7+ years of professional experience** building and operating web applications, APIs and business-critical services. I combine strong Laravel and Symfony experience with hands-on Vue 3, TypeScript and React exposure, backed by MySQL, Linux-based delivery, automated testing and production ownership.

I have acted as a technical referent, reviewed code daily, guided developers and coordinated internal and external contributors. I translate incomplete product requirements into pragmatic technical options, scoped tasks and acceptance criteria, then support delivery through implementation, review, documentation, release and production monitoring.

Core Skills

Full-stack development: PHP 8 · Laravel · Symfony · API Platform · REST/OpenAPI · Vue.js/Vue 3 · TypeScript · JavaScript · React exposure · HTML5 · CSS3 · Twig · Nuxt.js

Data and performance: MySQL/MariaDB · PostgreSQL · Redis · Doctrine/Eloquent · schema design · indexing · query optimisation · queues/workers · WebSockets

Technical leadership and governance: requirements clarification · technical direction · delivery planning · code review · developer guidance · supplier coordination · documentation · release readiness · access and role modelling · production support

Quality and operations: PHPUnit · Behat · integration and end-to-end testing · PHPStan/Larastan · Git · Docker/Compose · Linux · Apache/Nginx · GitHub/GitLab CI/CD · Jenkins · Kubernetes · AWS CloudWatch · ELK · Grafana · Sentry

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments · position eliminated in a redundancy

- Developed and operated PHP/Laravel services supporting fraud prevention, mobile payments and real-time processing across several products.
- Improved performance and scalability through MySQL indexing and a progressive migration of high-traffic tracking and scoring data to Redis.
- Integrated Auth0 and Laravel Sanctum across multiple applications and contributed targeted improvements to a React product.
- Helped shape architecture and migration decisions while balancing maintainability, backward compatibility, security, performance and delivery risk.
- Performed daily code reviews across four to five developers, reinforced practical engineering standards and supported refactoring, testing and release readiness.
- Investigated incidents with ELK and Grafana, participated in production on-call and monitored deployments with rollback plans.
- Collaborated with international stakeholders and delivered technical workshops in English on OOP, testing/TDD and Xdebug.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Business automation

- Designed and delivered a JWT-secured Symfony/API Platform service for asynchronous PDF-to-XML processing, from requirements and API contracts through testing, deployment and documentation.
- Developed Laravel business features with the Product Owner and translated incomplete requirements into implementable technical solutions.
- Coordinated a binary-processing supplier and supported a front-end supplier with clear technical context, reviews and integration requirements.
- Reviewed internal and supplier pull requests and guided an internal developer on Laravel and Git delivery practices.
- Improved delivery discipline through Docker, GitHub/GitLab CI/CD, Postman/Newman checks, AWS CloudWatch, Sentry and multi-environment documentation.

Earlier Experience

- **Groupe Blachère — Software Development Engineer: December 2020–January 2021 · fixed-term contract · 1 month actually worked.** Built a Symfony/API/Docker logistics prototype with object-oriented domain modelling, tests and PHPStan.
- **SensioLabs — Back-End Developer: April–September 2018 · 6 months.** Delivered Symfony/API Platform integrations with Microsoft Graph, Yammer and Bing using RabbitMQ, Redis, JWT, Behat, PHPUnit, Docker and CI.
- **Norsys — Back-End Developer / Symfony Technical Referent: 2016–2018.** Supported three developers through feature breakdown, code review, architecture decisions and Doctrine optimisation on projects for Decathlon, Fiducial, Technal and Franprix.
- **Activ'Company — Web Developer: December 2013–January 2015 · 1 year 2 months.** Developed a Symfony 2 professional social platform and contributed to front-end work, ERP integration and a Doctrine-to-MariaDB migration.
- **YouMiam — Web Developer: 2015.** Contributed Symfony and front-end features to a culinary social product, including Facebook Login, Elasticsearch queries and interface improvements.

Independent Product Engineering

Sonomundi — Laravel/Vue Event and Music Platform

December 2025–Present · Side project, now largely automated

- Built a Laravel 12/Vue 3/TypeScript product covering multi-role workflows, REST/OpenAPI contracts, MySQL, Redis, asynchronous processing and administrative interfaces.
- Own product modelling, architecture, implementation, testing and documentation, with Docker, CI/CD validation and monitored deployments.
- Use controlled AI-assisted workflows for analysis and implementation while keeping architecture, review, reproducible testing and final integration under human control.
