

Sébastien Grans

Senior PHP/Laravel Backend Engineer | Authentication · Secure APIs · Cybersecurity

Lozère, France · Fully remote within the EU · CET timezone

sebastien.grans@gmail.com · [Linkedin](#) · [GitHub](#) · [Portfolio](#)

Target role: PHP Laravel Developer (Cybersecurity) — Rublon

Profile

Senior back-end engineer with **8+ years of professional PHP experience** across Symfony and Laravel. I build secure APIs, authentication flows and business-critical services, with hands-on responsibility for testing, performance, CI/CD and production support.

At Evina, I spent two years developing Laravel services for cybersecurity, fraud prevention and mobile payments. I integrated Auth0 and Laravel Sanctum across several applications, worked on multi-application login and access roles, and contributed to vulnerability checks, API compatibility and incident response.

Core Skills

Back end: PHP 8 · Laravel · Symfony · API Platform · REST/OpenAPI · Eloquent/Doctrine · queues/workers · WebSockets · JavaScript/TypeScript

Authentication and security: Auth0 · Laravel Sanctum · JWT · multi-application login/SSO · roles and access control · secure API design · OWASP awareness · dependency and Docker-image vulnerability checks

Quality and data: PHPUnit · Behat · integration and end-to-end testing · PHPStan/Larastan · code review · MySQL/MariaDB · PostgreSQL · Redis

Delivery: Docker · Kubernetes · AWS · GitHub/GitLab CI/CD · Jenkins · ELK · Grafana · Sentry · Linux · controlled AI-assisted engineering workflows

Professional Experience

Evina — Senior Back-End Developer

June 2022–June 2024 · Full remote · Cybersecurity and mobile payments

- Developed and operated PHP/Laravel services supporting fraud prevention, mobile-payment flows and real-time processing.
- Integrated Auth0 and Laravel Sanctum across three Laravel applications and a related platform to standardise authentication and multi-application login.
- Implemented user data normalisation, asynchronous import commands and role mapping, with attention to service continuity and data integrity.
- Checked dependencies, application code and Docker images for vulnerabilities and contributed to secure design, API compatibility and refactoring decisions.
- Reduced latency and MySQL load through indexing and a progressive migration of high-traffic tracking and scoring data to Redis.
- Wrote and reviewed tests, participated in daily code reviews and investigated incidents through ELK and Grafana in a multi-region environment.

Sapiendo — Back-End Developer / DevOps

February 2021–May 2022 · Full remote · Business automation

- Designed a JWT-secured Symfony 5.4/API Platform service for asynchronous PDF-to-XML processing.
- Built documented REST endpoints, callbacks, Doctrine models and automated integration tests.
- Developed Laravel business features and supported Docker, GitLab CI/CD, AWS CloudWatch and Sentry workflows.

Earlier Experience

- **Groupe Blachère — Back-End Developer (Dec. 2020–Jan. 2021):** Symfony, domain modelling, optimisation algorithm, tests and PHPStan.
- **SensioLabs — Symfony Developer (2018):** Symfony/API Platform, RabbitMQ, Redis, JWT, PHPUnit and Behat.
- **Norsys — PHP/Symfony Developer and Technical Referent (2013–2018):** applications for Decathlon, Fiducial, Technal and Franprix; architecture support, code review and mentoring.

Side Projects

Sonomundi — Laravel/Vue Event Platform

July 2024–Present · Side project, now largely automated

- Built a Laravel/Vue 3 product using Sanctum, REST/OpenAPI, MySQL, Redis, asynchronous workflows, automated tests, Docker and CI/CD validation.
- Use controlled AI-assisted workflows and specialised agents for implementation and review, with executable tests and human validation as safeguards.
